

# Operation Analytics and Investigating Metric Spike

# Project description

- ▶ In this project , we will perform operation analysis on the provided table record.
- ▶ Operation Analytics is the analysis done for the complete end to end operations of a company.
- ▶ With the help of this, the company then finds the areas on which it must improve upon.
- ▶ This kind of analysis is further used to predict the overall growth or decline of a company.
- ▶ **Investigating metric spike** is also an important part of operation analytics.
- ▶ With the help of this analysis, data analyst is able to understand and answer to various question related to progress of company.

# Operation analytics

- ▶ Operational analytics is a category of business analytics that enables **continuous monitoring of data** and discovery of insights to help teams make better decisions on the fly.
- ▶ In simple words, it processes real-time signals from various parts of a business to offer instant feedback. It lets you sync information directly from your data warehouse into front-end tools—Salesforce, Marketo, HubSpot, etc.— that your team uses every day.
- ▶ This allows teams to accurately track data across various platforms and tools, streamline everyday business operations, improve efficiency, and enhance cross-functional team collaboration.

# Approach

- ▶ Get the information from given description about data and understood the problem.
- ▶ Go through the row data and understand the variable and attribute as given.
- ▶ Used MySQL Workbench I import files in new database Ops spike and I started writing my queries as question asked to achieve the result.
- ▶ Executed the Queries and if there are any errors in the code, I modified the code and fixed the code without any errors.
- ▶ Once done all queries I cross checked all the quires and save in the file.
- ▶ Finally, I attached my code to the file.
